If you have driven Copper Canyon Road from FM 407 lately you probably noticed how nice the right-of-way looks. A big thank you to Peter Vickery for donating his time to keep Copper Canyon beautiful.

Mayor Pro Tem Bill Castleman, Deputy Tony Glover, and Town Administrator Donna Welsh are meeting this week with Denton Sheriff's Office personnel to discuss Neighborhood Watch. With all the development in the North Texas area it is even more important to be aware of what is going on around us and keep our neighborhoods safe.

Deputy Mayor Pro Tem Cannaday and Council Member Robin Douglas-Davis have been meeting with town planners to get direction on updating the Master Plan. The first meeting of the committee will be Wednesday, September 25th and the committee will discuss a plan to move forward on the 2020 Master Plan for Copper Canyon.

Council Member Steve Hill has been working with staff and financial advisors on the town proforma. The plan will be updated based on several factors. Toll Brothers will start development in late 2020. There are two smaller projects that have been approved for a total of twenty-two new homes. The town is also planning a large road program in 2020.

Council Member Ted Stranczek has been working with the town engineer by driving the town roads and identifying areas that need repair or replacement. There is also bridge work that needs to be done in the next road project. Council Member Stranczek is also working with the town engineer on drainage issues within the town.

The staff has been very busy implementing a new software suite called Fundview. In the past, staff has worked with various software programs that are not integrated. It is not only costly to pay license fees on separate programs; it requires manual transactions to work within the programs. The new software integrates municipal Court, accounts payable, accounts receivable, general ledger, payroll, cash receipting and several other areas. The new software will help staff operate more efficiently and allow the town to be more transparent in all financial areas.
